Turn "Do not disturb" on or off for Android Phone
Open the Quick settings panel by swiping down from the top of the screen using two fingers. Swipe to and tap the **Do not disturb** icon to turn it on or off.

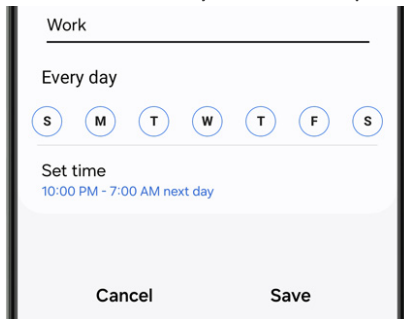

You can also go to **Settings**, then search for and select **Do not disturb**. Tap the switch next to **Do not disturb** to turn it on or off.

Do not disturb schedule
You can also set multiple schedules for **Do not disturb** to automatically activate, so you can make sure notifications won't interrupt important meetings, or disturb your sleep.

1. Open the Quick settings panel by swiping down from the top of the screen using two fingers.
2. Touch and hold the **Do not disturb** icon to open up its settings menu. From here, tap Add schedule to add a new schedule. On some devices, you may need to tap Turn on as scheduled instead, and then tap Add (the plus sign) in the top right corner.
3. Enter a title and your desired preferences, and then tap **Save**.

4. Tap the **switch** next to your new schedule to turn it on or off.
5. Repeat the process as many times as needed, so you won't be disturbed during the times you need to focus.

Set up exceptions
When you want to turn on **Do not disturb** mode but may want certain people to contact you, you can allow exceptions and customise what alerts you receive.

1. Open the Quick settings panel by swiping down from the top of the screen using two fingers.
2. Touch and hold the **Do not disturb** icon to open up its settings.
3. Swipe to the Allowed during **Do not disturb** section, and then select from the displayed options.

- **Allow calls and messages** from your desired contacts, as well as repeat callers
- **App notifications:** You can select specific apps that will be able to notify you when Do not disturb is enabled.
- **Alarms and sounds:** Select from Alarms, Media sound, Touch sounds, Calendar events, and Reminders.

You can also control which notifications are hidden by tapping **Hide notifications**. Critical notifications about phone activity or status will not be hidden.

- **Hide all:** All notifications that are not subject to an exception will be hidden.
- **Hide full screen notifications:** Full screen notifications will be hidden.
- **Hide app icon badges:** Hide your app icon badges when you receive a notification.
- **Hide from notification panel:** Hide your new notifications on the notification panel.
- **Don't show pop-up notifications:** Pop-up notifications will be hidden.
- **Hide status bar icons:** Status bar icons will be hidden
